5. If you count one-to-one and stop at 3, how many objects did you count?

6. If you count one-to-one and stop at 13, how many objects did you count?

7. If you count one-to-one and stop at 9, how many objects did you count?

8. If you count one-to-one and stop at 14, how many objects did you count?

9. If you count one-to-one and stop at 8, how many objects did you count?

10. If you count one-to-one and stop at 16, how many objects did you count?

11. If you count one-to-one and stop at 6, how many objects did you count?

12. If you count one-to-one and stop at 20, how many objects did you count?

13. If you count one-to-one and stop at 12, how many objects did you count?

14. If you count one-to-one and stop at 17, how many objects did you count?

15. If you count one-to-one and stop at 11, how many objects did you count?

16. If you count one-to-one and stop at 1, how many objects did you count?

17. If you count one-to-one and stop at 5, how many objects did you count?

18. If you count one-to-one and stop at 7, how many objects did you count?

Answer Key

1. **2** The last number counted tells how many: 2.
2. **5** Touch each object as you count. The last number is 5.
3. **8** 2 rows of 4 - count them all: 8.
4. **14** Count each star: 14.
5. **3** The last number counted tells how many: 3.
6. **13** The last number counted tells how many: 13.
7. **9** The last number counted tells how many: 9.
8. **14** The last number counted tells how many: 14.
9. **8** The last number counted tells how many: 8.
10. **16** The last number counted tells how many: 16.
11. **6** The last number counted tells how many: 6.
12. **20** The last number counted tells how many: 20.
13. **12** The last number counted tells how many: 12.
14. **17** The last number counted tells how many: 17.
15. **11** The last number counted tells how many: 11.
16. **1** The last number counted tells how many: 1.
17. **5** The last number counted tells how many: 5.
18. **7** The last number counted tells how many: 7.
